

Communities In Action

Richland County Quality of Life Strategic Plan

Bi-Annual Up-date - July 2018

Communities In Action (CIA) steering committee and associated action groups have impacted several community issues in the last 3 years. This Bi-annual report is the final report on the current strategic plan. CIA is in the process of completing a community health assessment (CHA) and a community health improvement plan(CHIP) referred to as the Richland County “Quality of Life” Strategic Plan for 2019 – 2021. This document is a summary of what was accomplished and is color coded to indicate the level of completion. Red means that the work was either not started or the approach was changed, yellow means that a project has been started but the measure has not been met, and green means that a project is complete or well on its way to completion. The only areas included in this summaries are areas that were addressed in some manner.

Please stay tuned for information on creating our new strategic plan (CHIP). We will be reviewing community assessment data and convene meetings to identify community issues we wish to address in the next three years. Community participation is essential and we welcome any in-put. You may contact Kali Godfrey at the health department at 433-2207 if you would like to actively participate in the process!
